

AIR BURNER NOW AVAILABLE!

Our 950 McCarty Street dump site location just got a whole lot hotter! There's no need to go to multiple locations to dispose of your project waste. Come check out our new Air Burner, and call today to reserve your spot!

OUR DUMP SITE IS HOT!

We know it can be difficult to find a dump site facility that can recycle hard-to-handle loads of items like large wooden spools, root balls, tree stumps, and other construction and wood debris.

If you have land clearing waste, landscaping project waste, fire pit debris, or industrial site debris - look no further! The Gainsborough Waste dump site now offers an Air Burner that is able to process and recycle these items.

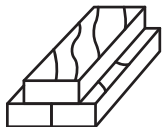

This new heavy-duty equipment is built on a strong steel skid base and is the most economical and environmentally friendly solution for eliminating wood debris. With the Air Burner, you do not need to grind, chip, or do any additional processing of your waste. If it fits in the top, it will burn quickly and cleanly!

PRICING

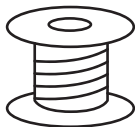

\$12.00 per cubic yard

WHAT CAN BE PROCESSED
